BUSINESS INTELLIGENCE

Migrate Oracle Reports to BI Publisher

The ability to easily access, manage and report information is critical in business today. Users require timely, accurate and actionable reports that provide highly usable business information, without the deployment, management, and usage complexities inherent in traditional analytical reporting solutions.

Oracle Business Intelligence (BI) Publisher provides the flexibility and functionality needed to meet the increasing demands by users for functional reports. BI Publisher is an enterprise reporting solution to author, manage, and deliver all types of highly formatted documents. End users can easily design report layouts using familiar desktop tools, dramatically reducing the time and cost needed to develop and maintain the reports that deliver the information on which business decisions are made each day.

Companies running Oracle Reports look to Unify | CipherSoft to seamlessly and cost-effectively migrate their Oracle Reports to BI Publisher. Unify | CipherSoft is a validated Oracle Migration Partner with proven technology and methodologies that make the conversion process easier, faster and more cost-effective.

Why Use Unify | CipherSoft?

Unify | CipherSoft has performed over 250 migration and conversion projects for clients worldwide. Our conversion projects result in minimal disruption, little to no retraining efforts and manageable risk. Our clients rave about our experience and expertise in delivering conversion projects on-time and within budget. They select us for our speed, methodology, customer service and price. We provide the most cost-effective Oracle Reports to BI Publisher conversions available and we have a satisfied, referenceable customer base.

Sample Conversion Procedure

1. Migrate PL/SQL libraries to database libraries and packages
2. Migrate Before Parameter Form and After Parameter Form triggers to Before Report and After Report triggers
3. Convert report to BI Publisher (using conversion utility)
4. Create Packages and procedures in database after removing ambiguities in columns, parameters and variables names
5. Test data source output in XML format, update the PL/SQL code where required
6. Fix the template to make it similar to source report format
7. Program the Format triggers in Extensible Stylesheet Language (XSL/XSL-FO) to implement source report functionality in template
8. Upload the report in BI Publisher
9. Test the report in BI Publisher
10. Resolve run time issues if any

About Unify | CipherSoft

Unify | CipherSoft, a wholly-owned subsidiary of Unify Corporation, is a leading software migration company specializing in providing Oracle Forms application conversions to organizations globally. Unify | CipherSoft is a member of Oracle's Modernization Alliance, Oracle Technology Network and Oracle Partner Network.
